About me

Full-Stack Developer passionate about turning ideas into impactful digital products. I enjoy building web applications that integrate clean UI design with efficient and reliable backend systems. Recently, I worked on integrating AI features and serverless architecture in a blogging platform, deepening my understanding of scalability, performance, and user-focused development.

Education

Vidyalankar Institute of Technology, Mumbai 2020 – 2023
Bachelor of Engineering in Computer Engineering

- CGPA: 9.6 / 10

K.K. Wagh Polytechnic, Nashik 2017 – 2020
Diploma in Computer Technology

- Percentage: 90.11%

Experience

Jio Platforms Limited – Navi Mumbai Dec 2023 – Present

- Developed a MERN stack web platform to track employee performance, project contributions, and product insights, improving operational transparency across teams.
- Led the AI Bot team, managing training data generation across multiple Jio projects, improving chatbot accuracy by 30%.
- Created and curated 1500+ Q&A pairs for conversational AI models and refined responses through iterative testing and feedback.
- Conducted QA testing across 10+ Jio applications, identifying and helping fix 90+ bugs prior to release.

TCR Innovations – Remote Jan 2022 – Apr 2022
Data Science and Machine Learning Intern

- Built predictive models for employee attrition achieving 90% accuracy using Python (Pandas, NumPy, scikit-learn).
- Performed end-to-end data analysis, feature engineering, and visualization to identify key HR trends and risk factors.

Sumago Infotech – Nashik May 2019 – Jun 2019
Web Development Intern

- Developed responsive websites using HTML, CSS, PHP, and Bootstrap, ensuring cross-browser compatibility and smooth UX.
- Gained experience with XAMPP server setup and local deployment pipelines.

Projects

MediumAI – AI-Powered Blogging Platform mediumai.vercel.app |

- Built a full-stack blogging platform integrating AI-powered text enhancement and summarization features using Google Gemini.
- Designed a type-safe, serverless backend with **Hono** on **Cloudflare Workers**, implementing JWT authentication, and Prisma ORM for PostgreSQL.
- Developed a responsive **React + TypeScript** frontend with real-time editing, AI-assisted content generation, and intuitive Markdown rendering.
- Deployed globally via **Vercel (frontend)** and **Cloudflare Workers (backend)**.
- **Tech Stack:** React, TypeScript, Hono, Cloudflare Workers, Prisma, PostgreSQL, Tailwind CSS, Gemini API

EZpay – Peer-to-Peer Money Transfer App

ez-payy.vercel.app

- Developed a secure, responsive web app for instant peer-to-peer money transfers using the **MERN stack**.
- Implemented robust authentication and authorization flows with JWT and Bcrypt for secure access control.
- Integrated real-time balance updates and seamless user search for an intuitive transaction experience.
- Designed a clean, modern UI with **Tailwind CSS** for smooth and consistent user interaction.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Axios, JWT, Bcrypt

Technologies

Languages: JavaScript, TypeScript (Basics), Python (Basics), HTML, CSS

Frontend: React.js, Tailwind CSS, JotAI, Axios

Backend: Node.js, Express.js, Hono, JWT Authentication, RESTful APIs

Databases & ORM: MongoDB, PostgreSQL, Prisma ORM, MySQL

Tools & Others: Git, Postman, Supabase, Google Gemini API, Serverless Deployments (Cloudflare Workers, Hono)
